# PROJECT 3 – T1 ASSIGNMENT

---

Individual Submission

MARCH 1, 2022

CAPE PENINSULAR UNIVERSITY OF TECHNOLOGY  
Tyler Yorke Fredericks – 218047894

## Role in the group:

I am group 16's Project Secretary and therefore in charge of documenting all group meetings from the time they begin and to the time they end which is to include attendance and contents discussed in the meetings. I am also one of the Web Developers as everyone else in our group.

As one of the group's Web Developers I am responsible for developing our Website's Home Page/Landing Page and Database creation.

## Tasks:

As the group secretary I have documented all meetings and their minutes.

I have also created the Discord Server which our group will be using as our main platform to conduct meetings, presentations, and collaborations.

As for the Project's Web Development – I was given the task of Developing our Homepage and Database Creation. We have not begun developing our website yet but I have taken the steps to learn PHP since I have no experience regarding PHP. I have done a small amount of studying thus far including a LinkedIn Course targeted towards Database Development.

## Progress:

As a group we are yet to begin coding but I have taken steps to learn PHP and will continue as we move towards developing our project since I have not yet experimented with databases in web development. I will be taking advantage of the LinkedIn Learning license provided to me and continue to use it as a resource for learning Web Development and Databases. So far everyone in Group 19 including myself have become comfortable with the platform we will use for communication.

## What I learnt:

I believe I have learnt the basics in PHP and will continue to expand on that. I also feel that my group is a bit on the slow side of starting meetings and collaborating and will bring that up in the future and try to begin meetings slightly earlier so as to have everyone including myself begin the meeting at the current desired time slot.

## GitHub: (<https://github.com/Thearox/Project3>)

We currently do not have a GitHub repository for the project but I believe we will be hosting the website on "VEHost" (<https://vehost.co.za>) which includes live editing and changes to any code on the Website. I have however created a personal repository for the project which will contain all files related to the Project 3 Assignment.

## LinkedIn Learning:

I have decided to learn a Database Foundations course since I am tasked with the creation of our Database using PHP. I will continue to do more LinkedIn Courses regarding the topic to expand my knowledge.
